An Assessment of Current Technology Transfer Proposals and Key Mechanisms for Diffusion

Dominic Marcellino
Ecologic Institute, Washington, DC

December 3rd, 2009
Outline of Comments

- Project overview
- Tech transfer negotiations in context
- Outstanding issues
- Findings and recommendations
- Key mechanisms
Outline of Comments

- Project overview
- Tech transfer negotiations in context
- Outstanding issues
- Findings and recommendations
- Key mechanisms
Outline of Comments

- Project overview
- Tech transfer negotiations in context
- Outstanding issues
- Findings and recommendations
- Key mechanisms
Outstanding Issues

- Needed investment flows
- Public actions to harness private investments
- Effectiveness of new technology body
- Creating a new technology fund
- Intellectual property rights
- Contribution of market mechanisms
Outline of Comments

- Project overview
- Tech transfer negotiations in context
- Outstanding issues
- Findings and recommendations
- Key mechanisms
Findings and Recommendations

- Public finance and policy have key roles to play
- Market-based mechanisms effective but must be complemented by other measures
- Intellectual property is not currently a barrier
- Any new technology body should be integrated into the current governance structure
- Strategic planning is essential for a new technology-related fund
Outline of Comments

- Project overview
- Tech transfer negotiations in context
- Outstanding issues
- Findings and recommendations
- Key mechanisms
Key Mechanisms

- Regional research and innovation centers
- Low carbon growth plans, etc.
- Capacity building and enabling environments
- Policy commitment and removal of market barriers
Thanks!!
