

From Green Growth Plans to Green Infrastructure Investments

9th December 2014 • 15:00 - 16:30 • room 1

UNFCCC conference at Cuartel General del Ejército del Perú

Key players and leading experts will discuss solutions to institutional and financial barriers to attract “green” investments, with a focus on cooperation opportunities in decarbonizing the energy matrix and building sustainable infrastructure. This includes the role of public private partnerships, standardization of project design, de-risking options, mobilization of domestic/international institutional investors. The panel will also look at project pipeline generation and at ways to address non-project risks and achieving financial closure.

Moderator:

- GGGI (Nikolaus Schultze, Assistant Director-General)

Panelists:

- James Bacchus, ICC Chair of the Trade and Investment Policy Group, member of the High Level Advisory Panel to the President of the COP to the UNFCCC
- Barbara Buchner, Senior Director, Climate Policy Initiative (CPI)
- Giles Dickson, Vice President Global Public Affairs, Alstom
- Christian Grossmann, Director, Climate Change, International Finance Cooperation (IFC)
- Maria Netto, Financial Institutions Lead Specialist, Inter-American Development Bank (IADB)
- Franco A. Piza R., Director of Sustainability, Bancolombia Group
- Gilles Vermot-Desroches, Senior Vice President of Sustainable Development, Schneider Electric
