Financing Market Transformation: The Case of Energy Efficiency?

EIB experiences

Christopher Knowles
Climate Change and Environment Division, EIB
EIB’s Climate Action 2008-2012

- Total c. EUR 79.2 bn

- 41% Sustainable Transport
- 27% Renewable Energy
- 9% Energy Efficiency
- 17% RD & I
- 4% Other
- 2% Climate Action Adaptation
EIB has at its disposal an extensive range of instruments to finance public and private sectors at investment and sub-investment grades of risk.

- **EIB lending instrument for Investment Grade operations**
- **Special Activities**
  - For low and sub-investment Grade operations

- **Public Sector Financing**
- **Project Finance Direct Loans**
- **Intermediated Loans**
- **Project finance with direct project risk**
- **LGT/RSSF (Mezzanine)**
- **Equity through Funds**
EIB ... A Different Type of Fund Investor:

- Policy test upfront
- Project driven
  (i.e. primary focus on the underlying assets in terms of fit with EIB objectives and economic benefit)
- Can invest time to work with a fund manager from concept stage
- Can go into segments not quite mainstream yet
  (e.g. bio-diversity, land decontamination, land use/carbon)
- Can support start-up teams and new concepts
  (e.g. Post 2012, Green for Growth)
- Can play different management roles alongside investment
  (e.g. Marguerite, GEEREF, GGF/EEEF)
## The Big Prize in Private Capital: Institutional Investment

### Table 2.1: Institutional investor assets under management (figures in billions of 2010 USD)

*Sources: OECD.Stat Insurance Statistics, OECD.Stat Pension Statistics, TheCityUK (2011a and 2012a), Investment Company Institute, Sovereign Wealth Fund Institute, McKinsey Global Institute (2011). Note: Estimated double-counting of $15tn, based on pension insurance contracts and pension assets potentially invested in mutual funds, ETFs, hedge funds and private equity funds. This estimate is based on an assumption that roughly $11.5 trillion in pension assets, both those managed by a fund and non-fund assets, are invested in third-party investment funds.*
Green for Growth

New Types of Infrastructure Fund (debt)

• Issuance of different share tranches (A, B, C and later Notes)
• Offering investors different risk-return profiles
• Managed by FIM
European Energy Efficiency Fund

- EUR 265 million (EUR 125 Mio EERP, EUR 75 Mio EIB, EUR 60 Mio CDP and EUR 5 Mio DB)
- Managed by Deutsche Bank (www.eeef.eu)
- Beneficiaries: Local & regional Public authorities, but PPPs are possible.
- Financing in form of loans, guarantees, forfeiting schemes (to finance ESCO projects)
- Technical Assistance (grant) is available to structure projects (EUR 20 Mio).
- 70% of the investment shall be targeted towards Energy Efficiency

September 2013: 8 loans, €80m committed
DEEP Green Initiative

- New EE products.
- Aggregation & de-risking.
- More lending to EE.

- Debt for Energy Efficiency Projects Green (DEEP Green) is an EIB initiative that aims at developing a suite of new financial products for four key groups of players in the EE market, namely, banks, public sector, ESCOs and utilities.

- DEEP Green targets aggregation and de-risking of energy efficiency (EE) projects, which are key barriers to the financing of EE investments.

- These new products will increase debt financing availability for EE projects by further developing EIB and commercial bank lending activity to EE.
The Green Deal is a UK Government initiative aimed at improving the energy efficiency of the UK’s building stock. The underlying idea is rather simple: install new green technology into a property with no up-front costs to the occupant. The installation costs are paid back through the energy bill over a period of time. Key feature of a Green Deal Plan is that it remains attached to a property’s electricity meter, not to the person taking out the Plan.
EIB also invests in EE through private equity model: main objective is to attract private investors to provide equity to EE projects

First operation co-investing with Green Investment Bank and private investors in UK
- Targeting non-residential energy efficiency projects in the UK
- Amount approved GBP 20m.
- Currently negotiating legal documentation.

An Italian EE fund currently under due diligence:
- Focus on ready to build projects, including the renovation of privately-held lighting infrastructure, as well as public street and other outdoor lighting systems
- Partnership with ESCOs for the implementation of EE projects originated by private counterparts or large municipalities
- Investments mainly through minority shareholdings in SPVs dedicated to specific energy efficiency projects
GEEREF is …

- Luxembourg based Fund of Funds, supported by

- Renewable Energy, Energy Efficiency focused
- Africa (special focus), Asia and Latin America
- Asset Finance (Hydro/Solar, EE, etc.)
- Small/medium size projects (~EUR 10m equity)
- Triple bottom line: People, Planet and Profit
Securitisation of energy efficiency receivables

• Innovative solution to provide financial support to:
  – Energy efficiency projects
  – Originated by local authorities and other public bodies
  – Performed by private ESCOs.
