

WHAT IS HAPPENING IN AMAZON DEFORESTATION?

Brazilian conservation policies **ARE MAKING PROGRESS**

New deforestation policies introduced

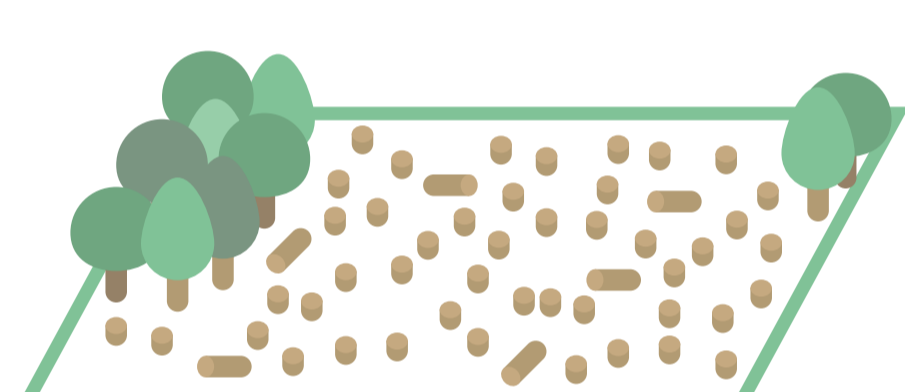

Deforestation rates dropped by **80%**

BUT

monitoring satellites **CAN'T DETECT** small clearings – those smaller than **25 HECTARES** (~ 30 soccer fields)

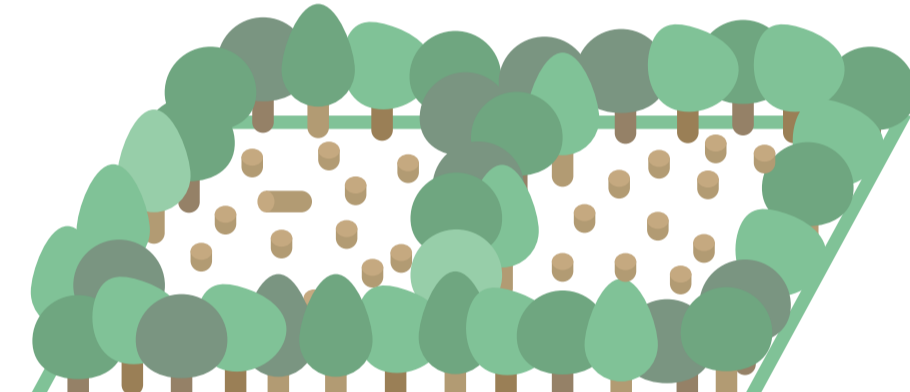

large clearings

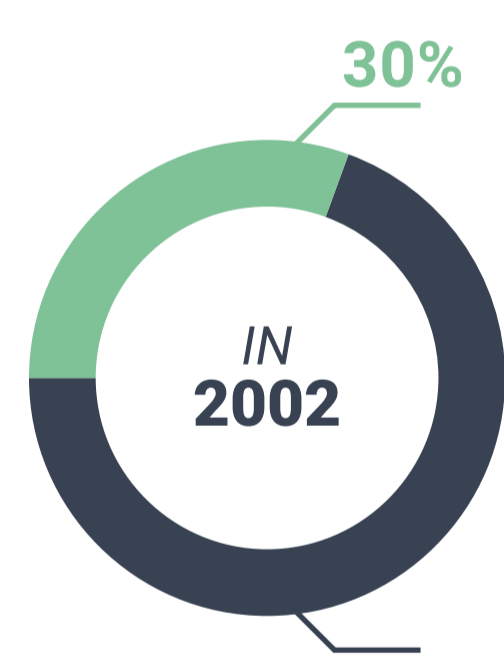

✓ **DETECT**

small clearings

✗ **CAN'T DETECT**

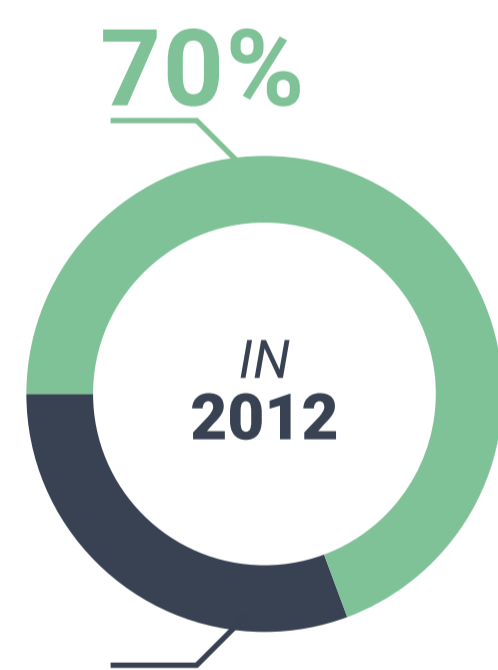

As a result, small clearings **ARE RISING** as a percentage of overall deforestation

small clearings

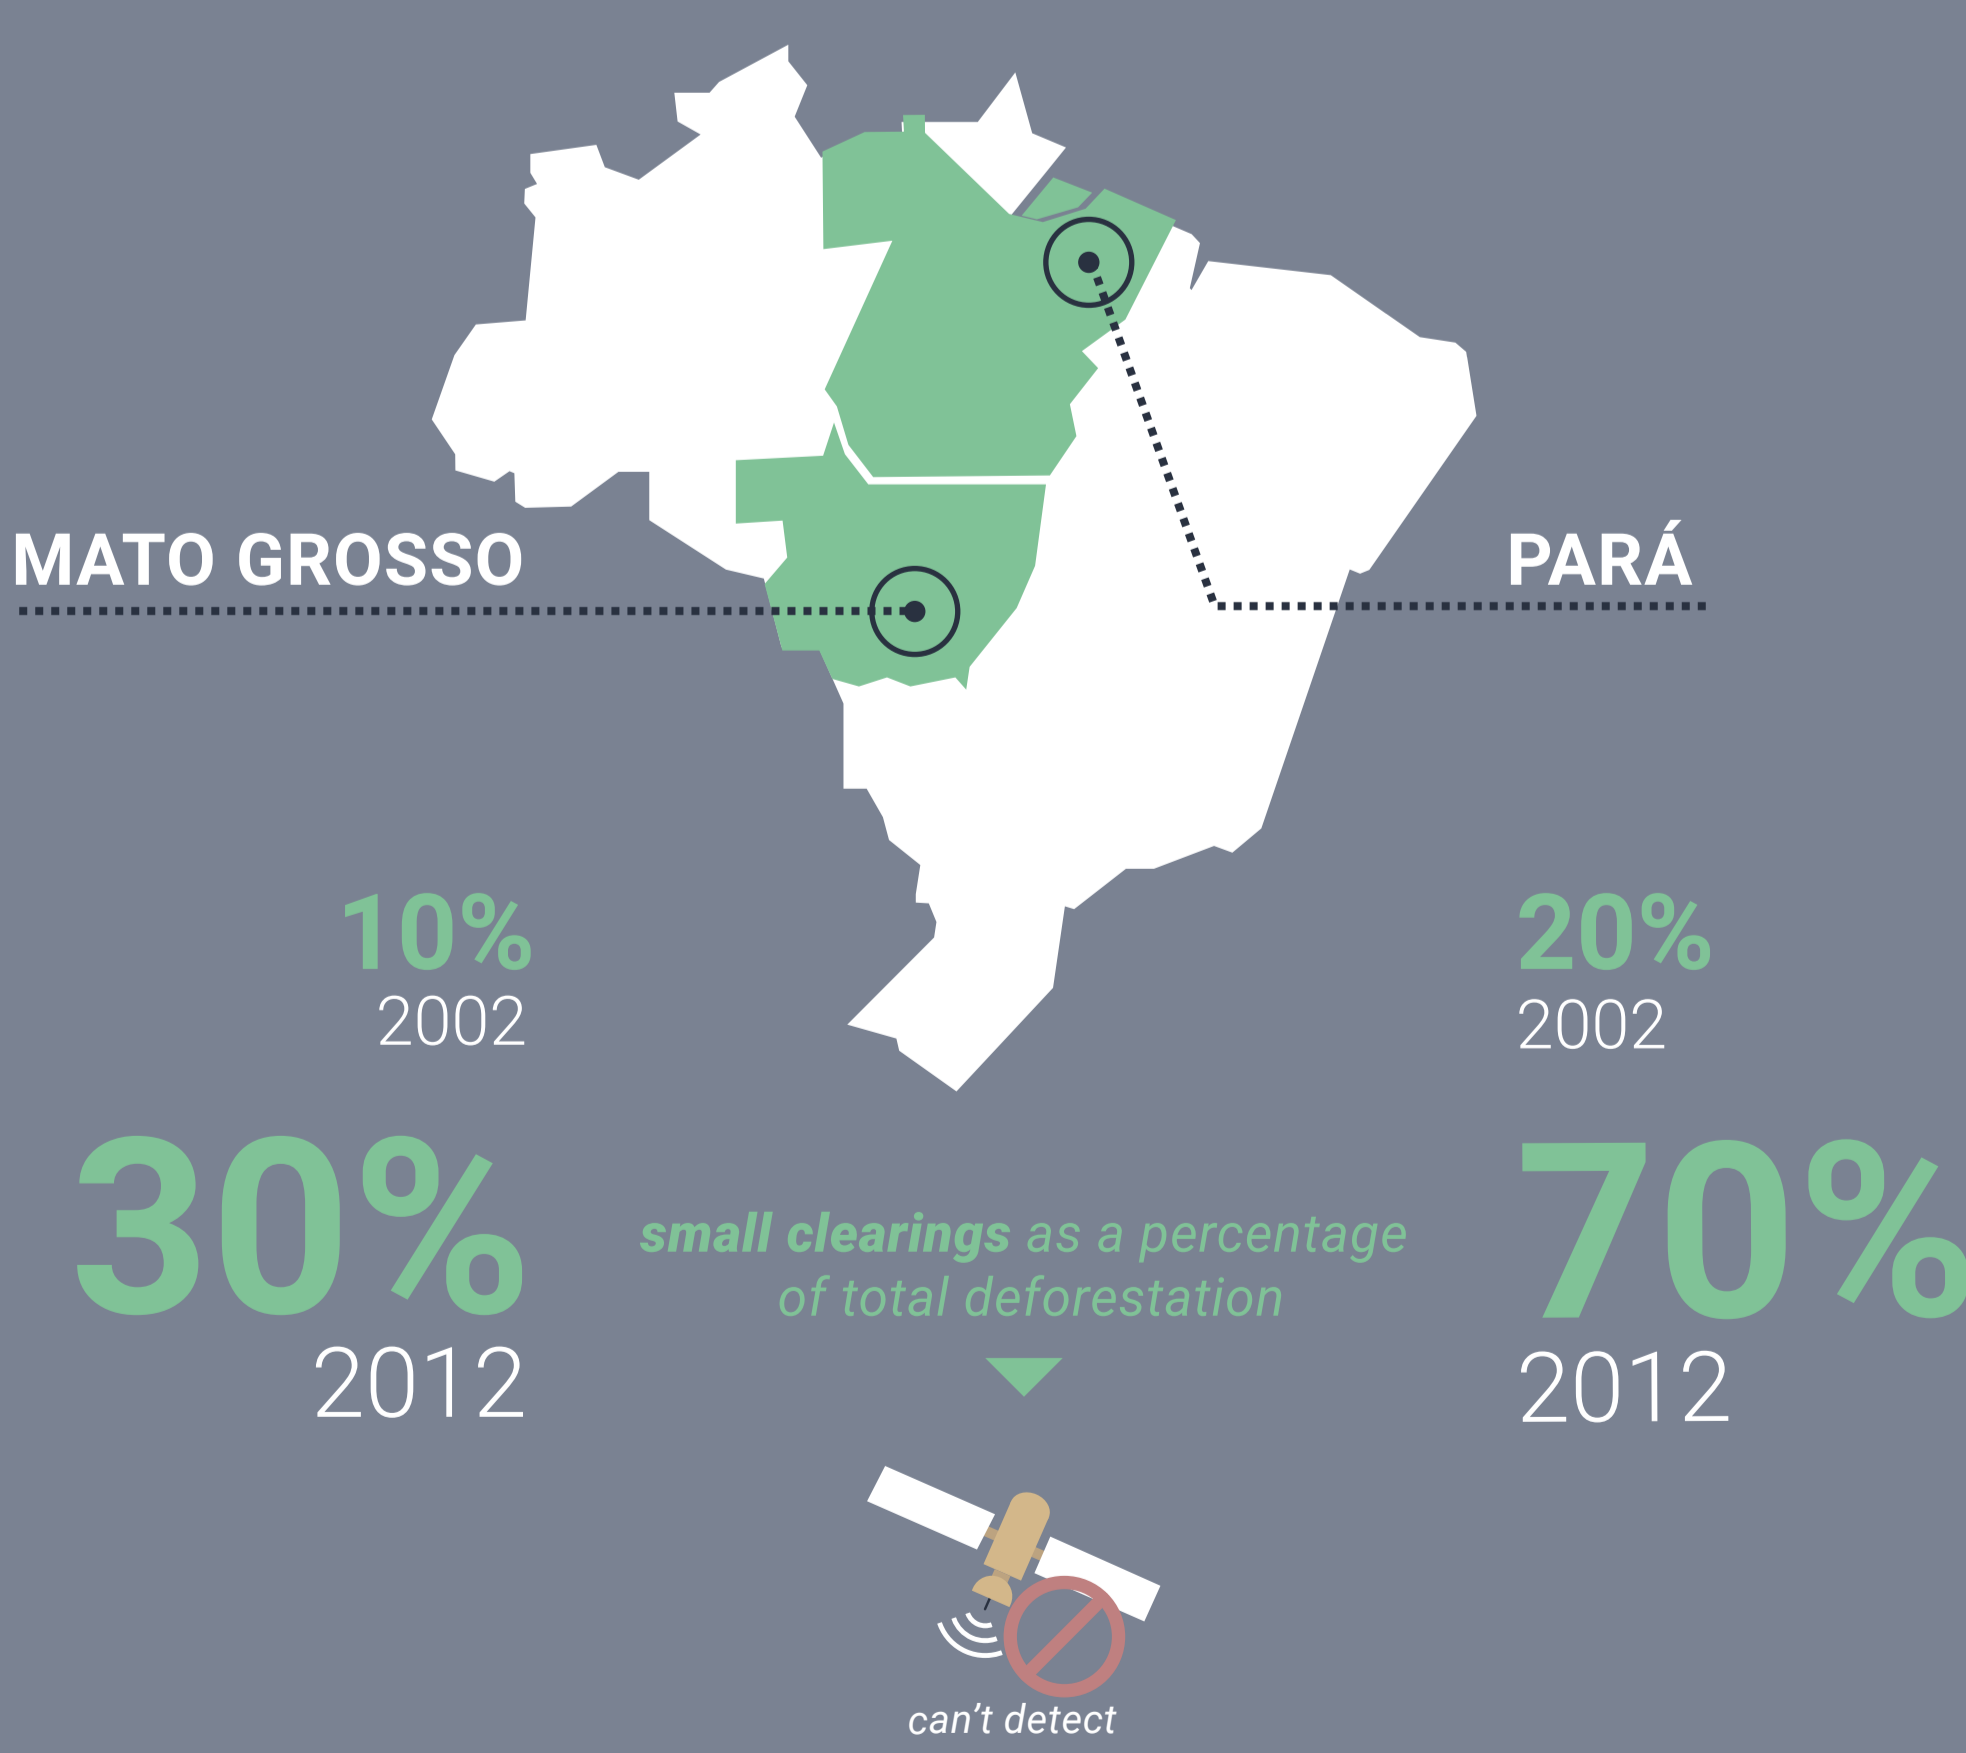

X

large clearings

People changed how they deforest to **AVOID DETECTION**

Deforestation practices differed from state to state

NEW POLICIES must tackle **REGIONAL DIFFERENCES** to strengthen the fight against deforestation
